Frequency Analysis of MSCAA Dual-Path Strip Convolutions
(Averaged over all channels and MSCAA instances in trained model)
(a) Frequency Responses
Branch-L (1×11+11×1)
Branch-S (1×7+7×1)
Normalized Magnitude
Normalized Spatial Frequency
(b) Complementary Coverage
Branch-L coverage
Branch-S coverage
L dominates
S dominates
Normalized Spatial Frequency
(c) Per-Channel Spectral Centroid
Spectral Centroid (norm. freq.)
Branch-L
(1×11)
Branch-S
(1×7)
